PROFILE

AI-augmented developer specializing in secure AI workflows, backend system design, and cybersecurity. Experienced in building full-stack and middleware applications integrating large language models, computer vision, structured APIs, and security-focused workflows, with demonstrated innovation through production-style projects and a filed patent.

TECHNICAL SKILLS

Languages & Databases: Python, C/C++, Java, SQL, MySQL

Frameworks & Backend: Django, Django REST Framework (DRF), REST APIs

Security Tools: Burp Suite, Wireshark, Nmap, Metasploitable

Development & Platforms: Linux, Git, Postman, VMWare/VirtualBox, VS Code

AI & GenAI: Prompt Engineering, LLM Integration (Gemini API), AI-Assisted Development, AI Safety

Core Areas: Generative AI, AI Security, Backend Development, Web App Security, Secure System Design

Soft Skills: Technical Documentation, Critical Thinking, Research & Analysis, Attention to Detail

CERTIFICATIONS & TRAINING

AI Security & Governance Certification

Jan 2026

Securiti

Securiti Education

- Developed practical skills in Generative AI guardrails by mastering governance frameworks to secure model integration
- Implemented risk strategies ensuring compliance with global AI safety laws
- Applied safety measures (input filtering, sanitization) for secure agents

AI Agents Intensive Training with Google

Nov 2025

Google

Kaggle

- Acquired expertise in agentic architecture (RAG, orchestration, tool-use) through Google-led labs
- Built and deployed AI agents covering models, orchestration, memory, and evaluation
- Deployed a functional agentic workflow for the final capstone project, earning a verified Kaggle achievement badge

PROJECTS

Project Cerberus: The AI Iron Dome | Python, FastAPI, Google Gemini API, Prompt Security

Nov 2025

- Engineered a secure AI reverse proxy with a fail-closed architecture to mitigate prompt injection attacks
- Implemented a 3-layer defense engine, detecting and blocking 50+ crafted jailbreak-style prompt patterns like DAN
- Deployed threat detection pipelines using FastAPI to mitigate key OWASP LLM Top 10 data exfiltration risks

Attend AI: Smart Attendance System | React, Django REST, MySQL, face-api.js

Jan 2026

- Developed a full-stack attendance system integrating browser-based face recognition with a Django REST backend
- Designed RESTful APIs, database schema, and timetable-based workflows to automate attendance tracking
- Led system architecture, debugging, and feature development using AI-assisted tools to accelerate development cycles

VaultGuard: Password Security Tool | Python, API Integration, Regex, Secure Coding

Sep 2025

- Developed a password analyzer that calculates a rule-based 0-100 strength score based on randomness and complexity
- Built a secure password generator using Python's secrets module to ensure strong, unpredictable credentials
- Integrated with real-time breach verification via the Have I Been Pwned k-anonymity API

PUBLICATIONS & PATENTS

Smart IoT Cookware System

May 2025

Patent Application Number: 202511048523

Patent Filed

- Architected an IoT induction system using a 10x10 electromagnet grid for pixel-level thermal control
- Designed event-driven logic processing real-time infrared data, reducing theoretical energy waste by 40%
- Specified hardware fail-safes and logic gates for immediate cutoff when temperatures exceed 250°C

EDUCATION

Lovely Professional University

Aug 2023 – Present

B.Tech in Computer Science & Engineering

Punjab, India

- Current CGPA: 7.6

Kendriya Vidyalaya Keltron Nagar

2022 – 2023

Senior Secondary (Class XII) – 80%

Kerala, India

Kendriya Vidyalaya Keltron Nagar

2020 – 2021

Secondary (Class X) – 77%

Kerala, India
